

Australian Designed and Manufactured Destination Signs

Angeltrax are proud to present our latest range of Destination Signs. Our Australian manufactured and engineered range includes the following features:

- Built-in step sensor to reduce consumption of power for light conditions
- Highly efficient LEDs to ensure high output for light conditions
- The signs are lightweight and have very low power consumption, contributing to fuel savings
- User-friendly GUI web-based software
- The sign has excellent readability, especially for the vision impaired
- The sign uses RS 485 or an Ethernet interface

Sign Type	Width (mm)	Height (mm)	Depth (mm)	Pixels (H)	Pixels (V)	Pitch (H)	Pitch (V)
Front (1)	1663	310	28	160	19	10	13.4
Front (2)	1544	310	28	140	19	10	13.4
Side	1043	225	28	160	19	6.1	8.7
Rear	340	270	28	40	24	6.8	8.7
Coach	870	170	28	80	7	10	16.3

Designed specifically for Bus Operators, for their industry

After extensive consultation with Bus Operators, we have designed our Destination Signs around their feedback, and have created a system with an ease of operation that saves valuable time. Our system has been specifically designed for the operators.

Our support team has been in the Destination Sign industry for 27 years, and is owned by a family-run company that has been manufacturing in Australia since 1950. We understand that to succeed, we need to partner with our clients and the people that we engineer our products for. We listen to what our clients requirements are and we respond.
